DETAILED ACTION

Claim Objections

1. Claim 2 objected to because of the following informalities: There should be punctuation after “include” in line 2. Appropriate correction is required.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claim 1 rejected under 35 U.S.C. 102(b) as being clearly anticipated by Furio et al.

Furio discloses a shield electric cable connector (title) for electrically connecting a shield electric a shield electric cable (16) to a mate member (fig. 2), the cable including one terminal portion (12, 14) peeled for said connector and the mate member (fig. 3), the terminal portion having a conductive shield layer (18) exposed from a sheath of the shield electric cable (fig. 2), the connector comprising: a conductive shield pipe (27) surrounding the terminal portion of the shield electric

cable (fig. 2); and a conductive shield-connecting member (25) surrounding the exposed shield layer between the exposed shield layer and the shield pipe (fig. 8), the shield-connecting member electrically connecting the exposed shield layer to the shield pipe (figures 8 or 14 & 15), wherein: the shield-connecting member has a pair of halves (26) that sandwiches the exposed shield layer from both sides in a radial direction of the exposed shield layer (fig. 8).

Allowable Subject Matter

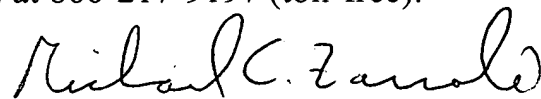

4. Claims 2-10 objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
5. The following is a statement of reasons for the indication of allowable subject matter: In combination with claim 1 claim2 specifically the first and second contact portions of the shield-connecting member.
